Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION**Election**

Applicant's election of Group XII in Paper No. 10 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Information Disclosure Statement

The information disclosure statement filed on 8/10/01, 2/27/02, 7/9/02, 2/20/03, 3/12/03 fail to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 158-212 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Miyamoto** et al (6,139,433) in view of **Himoto** et al (6,478,679).

Regarding claims 158-212, Miyamoto teaches a video gaming system that comprises a first game system that executes a first game program, the video gaming system carrying out the steps of generating first picture data in the game system that

Art Unit: 3714

simulates a first 3-dimensional (3-D) game world in which a first player-controlled animated character is viewed from a first variable 3-D viewpoint and camera angle for display on a first display device; changing the 3-D viewpoint and camera angle to a third viewpoint and camera angle; and generation of third picture data representing an object viewed in a second 3-D game world from a third viewpoint (abstract; col. 2, lines 30-67). Miyamoto is silent regarding the features of a separately housed portable game system having a discrete display device and a second processor and transmitting game data from the first game system to the second portable game system. In an analogous gaming system, Himoto teaches these features (abstract; Fig. 10; Fig. 11; Fig. 12; Fig. 15). It would have been obvious to a person of ordinary skill in the art at the time of the invention to include these features as taught by Himoto in Miyamoto in order to allow for players to be able to play the gaming systems at locations remote from the main gaming console system. This would increase player participation and make it easier for the players to interact with the game and thereby improve the player's enjoyment.
